

## Character Class Tables

The information on these tables is discussed further in the following section on **CHARACTER CLASSES**. The tables below give the official name of each level in each character class or profession and the experience points necessary for a character to rise to the next level of experience. The charts also give the type (and number) of dice used to determine the hit points for each class. Special tables are also given, listing the chances for a cleric to **Turn undead** and a thief's special abilities. The charts are arranged in alphabetical order, by class.

## CLERICS

| Level | Title                 | Exp. Points | Hit Dice | Spells        |
|-------|-----------------------|-------------|----------|---------------|
| 1     | Acolyte               | 0           | 1d6      | None          |
| 2     | Adept                 | 1500        | 2d6      | 1 first level |
| 3     | Priest (or Priestess) | 3000        | 3d6      | 2 first level |

## Clerics vs. Undead

| Cleric's Level | Skeletons | Zombies | Ghouls | Wights    | Wraiths   |
|----------------|-----------|---------|--------|-----------|-----------|
| 1              | 7         | 9       | 11     | No effect | No effect |
| 2              | T         | 7       | 9      | 11        | No effect |
| 3              | T         | T       | 7      | 9         | 11        |

**T** means that the cleric automatically Turns the undead; a **number** is the roll needed (on 2d6) to Turn. A complete explanation of Turning **undead** is given in the class description of clerics (page B9).

## DWARVES

| Level | Title               | Exp. Points | Hit Dice | Spells |
|-------|---------------------|-------------|----------|--------|

| 3     | Robber     | 2400        | 3d4      | None   |

## Thieves' Abilities

| Level | Open Locks | Find or Remove Traps | Pick Pockets | Move Silently | Climb sheer Surfaces | Hide in Shadows | Hear Noise |
|-------|------------|----------------------|--------------|---------------|----------------------|-----------------|------------|
| 1     | 15%        | 10%                  | 20%          | 20%           | 87%                  | 10%             | 1-2        |
| 2     | 20%        | 15%                  | 25%          | 25%           | 88%                  | 15%             | 1-2        |
| 3     | 25%        | 20%                  | 30%          | 30%           | 89%                  | 20%             | 1-3        |

Percentages represent the thief's chance for success. If the given number (or less) is rolled on d%, the thief is successful. The *Hear Noise* category is determined using a d6. Each ability is explained hereafter:

**Open Locks** may only be tried once per lock. The thief may not "try again" on a difficult lock until he or she has gained another level of experience.

**Find or Remove Traps** is a double ability. The thief has the listed chance of finding a trap (if there is one) and the same chance (if the trap is found) of removing it. Either attempt may only be tried once per trap.

**Pick Pockets** may be risky. If the DM rolls a number greater than twice the chance of success, the thief's attempt is seen. The DM should determine the reaction of any NPC who sees the thief's failed attempt. **EXAMPLE:** A 1st level thief was seen picking a pocket of an NPC party member (the DM rolled a 41 on percentage dice). Rolling 2d6 to determine the reaction of the victim the result is a 4 and the DM decides that the NPC will attack the thief.

**Move Silently** will always seem successful to the thief. However, the DM will know (based on the percentage roll) whether the thief's movement is actually heard by nearby enemies, and should have them take action if necessary.

**Climb Steep Surfaces**, when failed, will result in a fall. The thief will take 1-6 (1d6) points of damage for each 10 feet fallen. This roll should only be made once per 100' of climb attempted. If failed, the fall will be from halfway up the surface.

**Hide in Shadows** cannot be done unless the thief remains perfectly still (not moving or attacking). As with **move silently** above, the thief always thinks that he or she is successful in the attempt, but might not be. Only the DM knows for sure!

**Hear Noise** (rolled on 1d6) may apply to listening at doors or hearing something coming from any direction (such as a wandering monster). To use this ability, the thief must tell the DM that he or she is being quiet and trying to **hear noise**. During a battle, however, there is too much noise for anyone to hear anything unusual.
