

Encumbrance (Optional)

A person can only carry a limited amount of weight before being overloaded and unable to move. In D&D rules, weight is measured in coins (cn), rather than pounds, since all coin types are equal in weight and coins are the most common of treasures. Ten coins weigh one pound. Encumbrance (a combination of weight and bulk) will affect movement rates for characters.

Characters' movement rates are slowed by carrying excessive amounts of treasure and equipment and by the different types of armor they wear, as shown on the following **Character Movement** table. The encumbrances of the types of armor do not exactly match the coin weights, but when the encumbrance of the character's weapons, shield and gear are added, the encumbrances are about equal to these weights. The DM will need to determine the encumbrance of other items that characters might want to carry, such as a wounded character, and should compare this to the total coin weights given on the table to determine the characters' movement rates. Characters carrying more than 1600 coins of weight are overloaded and unable to move.

Character Movement

Character Encumbrance:	Normal Move (per turn)	Encounter or Combat Movement	Running Movement
400 coins or less OR unarmored	120'	40'/round	120'/round
401-600 coins OR leather armored	90'	30'/round	90'/round
601-800 coins OR metal armored	60'	20'/round	60'/round
801-1600 coins OR metal armored and carrying treasure	30'	10'/round	30'/round

A player carrying treasure in addition to wearing armor must use the movement speed one line below the normal one. Movement per round will be explained in the section on **Combat** (page B24). EXAMPLE: A character wearing leather armor **and** carrying treasure will move at the rate of 60' per turn.

Weights and Movement

Mules:

maximum load to move at 120'/turn	2000 coins
maximum encumbrance load (move at 60'/turn)	4000 coins

Items:

1 small sack holds	200 coins
1 large sack holds	600 coins
1 backpack holds	400 coins

The most that a character can carry is 1600 coins. The most a mule can carry is 4000 coins.

Encumbrance Table

	Item	Weight in coins
Armor:	Chain Mail Armor	400
	Leather Armor	200
	Plate Mail Armor	500
	Shield	100
Axes:	Battle Axe	50
	Hand Axe	30
Bows:	Bow + 20 arrows	30
	Crossbow + 30 quarrels	50
Swords:	Short Sword	30
	Normal Sword	60
	Two-handed Sword	150
Other Weapons:	Club	50
	Dagger	10
	Mace	30
	Pole Arm	150
	Spear	30
	War Hammer	30
Treasures:	Coin (any type)	1
	Gem	1
	Jewelry (1 piece)	10
	Potion	10
	Rod	20
	Scroll	1
	Staff	40
Misc. equipment and provisions:	Wand	10
	(including rope, spikes, sacks, wineskin, rations, etc.)	80

EXAMPLE OF ENCUMBRANCE (Morgan Ironwolf)

Chain Mail Armor	= 400 coins weight
Sword	= 60 coins weight
Shield	= 100 coins weight
Bows and Arrows	= 30 coins weight
Miscellaneous	= 80 coins weight
Total	= 670 coins weight

Therefore, according to the chart above, Morgan Ironwolf could move at 60' per turn.
