

MONSTERS

given number of rounds, leaving the character with an Armor Class of 9. A black dragon's acid Breath Weapon is different and causes damage for only one round per breath and then it is neutralized. It does 1/2 damage if the saving throw is made, and armor will only be destroyed if the character dies.

No. Appearing (Number Appearing) gives the suggested number of that monster type which will appear *when encountered on the same dungeon level as that monster's hit dice (or monster level)*. EXAMPLE: If a monster has 3 + 1 hit dice and the No. Appearing is 1-6, then 1d6 of those monsters may be commonly encountered on the 3rd dungeon level. When the same monster is met on levels greater than the monster's level, *more* monsters should be encountered or when encountered on levels less than the monster's level, *fewer* monsters should be found. The exact number is left to the DM's choice. EXAMPLE: If the 3 + 1 hit dice monsters mentioned above are encountered on the 1st dungeon level, only 1-2 or 1-3 might be encountered. On the 5th level, 2-12 or 2-16 of the monsters might be found. The numbers given in parentheses after the No. Appearing is the suggested number (if any) of that monster which might be met in the monster's lair (home) or in the wilderness, and will be useful information for use with the D&D EXPERT rules. Monster lairs in wilderness will usually be 5 times the number normally met in dungeons. A "0" given as the No. Appearing means that the monster will not usually be found in a dungeon (or wilderness, for a "0" in parentheses).

Save As gives the saving throw character class and level for the monster, equal to that of a player character of the same level. Unintelligent monsters save at 1/2 their monster level, with fractions rounded up. EXAMPLE: An animal-type monster with 3 hit dice will save as a character of level 1 1/2, rounded up to 2. Intelligent monsters usually save at their monster level. Monsters will normally save as Fighters. Some monsters which are enchanted, magical

D&D: BASIC

in nature, or have special abilities will have their saves adjusted as noted in the description.

Level makes no difference in the D&D BASIC rules with respect to saving throws, but it does make a difference in the D&D EXPERT rules. The DM may wish to give better saving throws to higher level monsters. A bonus of +2 on all saving throws may be given to a monster which is noted as having saving throws greater than a 3rd level character (for example, Fighter: 6). If the D&D EXPERT rules are used, however, this optional rule should *not* be used. Saving throws for higher level characters (and monsters) are explained in that book.

Morale shows the suggested morale level (an optional rule; see page B27) of the encountered monsters. The DM may wish to make adjustments to the morale in different situations. The DM then rolls 2d6 and if the roll is greater than the adjusted morale the monster will try to run away.

Treasure Type gives the letter of the treasure type which can then be used to determine any treasure in the monster's possession, using the **Treasure Types** table on pages B45-46. Not all monsters have treasure! Unintelligent animals *rarely* have treasure, though some animals might collect bright shiny objects, and any meat-eating creature might have recently killed someone who was carrying treasure. In general, treasure is usually found in a monster's lair (home). Wandering monsters are therefore less likely to be carrying treasure than monsters which have homes in the dungeon.

Alignment shows whether the monster is Lawful, Neutral, or Chaotic. Unintelligent animals are usually Neutral. The DM should be careful to play the alignment of each monster correctly. Only the intelligent monsters can speak an alignment language.

MONSTER LIST: Acolyte to Zombie

Acolyte

Armor Class:	2	No. Appearing:	1-8 (1-20)
Hit Dice:	1	Save As:	Cleric: 1
Move:	60' (20')	Morale:	7
Attacks:	1 mace	Treasure Type:	U
Damage:	1-6	Alignment:	Any

Acolytes are 1st level NPC clerics on a pilgrimage to or from a holy (or unholy) shrine — or perhaps merely seeking adventure. All of the clerics in the party will be of the same alignment, but the entire party has an equal chance to be Lawful, Neutral, or Chaotic. The acolytes do not know any spells. If there are 4 or more encountered they will be led by either a 2nd, 3rd, 4th, or 5th level cleric (roll 1d10: 1-4 = 2nd level leader, 5-7 = 3rd level, 8-9 = 4th level, 10 = 5th level). The DM may choose any clerical spells for the leader, or they may be rolled at random.

Animals, Normal and Giant: see **Ape, Bat, Bear, Boar, Cat, Ferret, Rat, Rock Baboon, Shrew, and Wolf**.

Ape, White

Armor Class:	6	No. Appearing:	1-6 (2-8)
Hit Dice:	4	Save As:	Fighter: 2
Move:	120' (40')	Morale:	7
Attacks:	2 claws	Treasure Type:	Nil
Damage:	1-4/1-4	Alignment:	Neutral

White apes have lost their color due to many years of living in caves. They are nocturnal, sleeping in the day and looking for fruits and vegetables at night. If creatures approach their lair, the apes

will threaten them. If their threats are ignored, they will attack. They may throw one stone per round for 1d6 points. White apes are not intelligent and sometimes are kept as pets by Neanderthals.

Bandit

Armor Class:	6	No. Appearing:	1-8 (3-30)
Hit Dice:	1	Save As:	Thief: 1
Move:	120' (40')	Morale:	8
Attacks:	1 weapon	Treasure Type:	U (A)
Damage:	1-6 or weapon	Alignment:	Chaotic or Neutral

Bandits are NPC thieves who have joined together for the purpose of robbing others. Bandits will act as normal humans in order to surprise their intended victims. Treasure Type (A) is only found when bandits are encountered in the wilderness in their lair. Bandits may have an NPC leader of any class, fighter, magic-user, thief, or cleric, who is of an experience level higher than the bandits.
