

COINS

All coins are about equal in size and weight. Each coin is about the size and weight of an American half-dollar piece. Electrum is a mixture of silver and gold. The value of each type of coin, and the rate of exchange between coins, is as follows:

10 copper pieces (cp)	= 1 silver piece
10 silver pieces (sp)	= 1 gold piece
2 electrum pieces (ep)	= 1 gold piece
5 gold pieces (gp)	= 1 platinum piece (pp)

100 cp = 10 sp = 2 ep = 1 gp = 1/5 pp

GEMS

The value of gems is determined by rolling percentage dice and consulting the table below:

Die Roll	Value of Gem
01-20	10 gp
21-45	50 gp
46-75	100 gp
76-95	500 gp
96-00	1000 gp

After finding the total value of all the gems in a treasure, the DM may combine or split them into different numbers of gems at any values. **EXAMPLE:** 5 gems worth 100 gp each might be placed as 1 gem worth 500 gp, 50 gems worth 10 gp each, or 10 gems worth 10 gp each plus 4 gems worth 100 gp each.

JEWELRY

A piece of jewelry is worth from 300-1800 gp, determined by rolling 3d6 and multiplying the result by 100. Jewelry can be dam-

aged by such things as very hot fire, lightning bolts, crushing, and other rough treatment. Damaged jewelry is worth 1/2 normal value. As with gems (see the **EXAMPLE** above), the DM may change the amount and value of the jewelry found. The DM may choose to allow jewelry of greater value than that given, although this is not advised for use with the D&D BASIC rules.

MAGIC ITEMS

A magic item can be of any of the several types listed. If a type of magic item is given on the **Treasure Types** table (such as "2-8 potions"), each of the items should be determined by using the appropriate subtable, **Potions**. If "Any" is given (such as "Any 3"), use the **General Magic** table to determine which subtable to use. Check for each item separately if more than one magic item is present.

IDENTIFYING MAGIC ITEMS: A character can only identify the exact type of item by testing it (trying on the ring, sipping the potion, etc.). If a retainer does this testing, he or she will expect to keep the item. A high level NPC magic-user may be asked to identify an item, but will want money or a service in advance and may take several game weeks to do it.

USING MAGIC ITEMS: Two things must be done to use most magic items. First, the item must be held or worn properly. Second, the user must concentrate on the effect the item has. (Magic weapons, armor, and protection devices — such as a ring or elven cloak — will work without concentrating.) Unless the description of the item states otherwise, the item can only be used once per round. A character concentrating on using a magic item cannot do anything else.

CHARGES: Many items will have a limited number of charges (uses). When the last charge is used, the item is not magical any more. It is not possible to find out how many charges an item has, and such items cannot be recharged.
