

Wand of Magic Detection: When a charge is used, this item will cause any magic item within 20' to glow. If the item cannot normally be seen (within a closed chest, for example), the glow will not be seen.

Wand of Paralyzation: This wand projects a cone-shaped ray when a charge is used. The ray is 60' long and 30' wide at its end. Any creature struck by the ray must save vs. Wands or be paralyzed for 6 turns.

Staff of Healing: This item will heal 2-7 (1d6 + 1) points of damage per use. It may only be used once per day on each person, but will heal any number of persons once a day. It does not have nor use any charges.

Snake Staff: This magical staff is a **Staff + 1**, and will inflict 2-7 (1d6 + 1) points of damage on a successful hit. Upon command, it will turn into a snake (Armor Class 5, Hit Dice 3, hit points 20, Movement rate 60' per turn, 20' per round) and coil around the creature hit. The command may be spoken when the victim is hit. Any victim man-sized or smaller will be held helpless for 1-4 turns (unless the snake is ordered by the owner to *release the victim before that time*), larger creatures are unaffected. Victims are allowed to make a save vs. Staves to avoid the serpents coil. When freed, the snake will crawl back to its owner and become a staff again. The snake is completely healed when it turns into a staff. If killed in snake form, it will not return to staff form and loses all magical properties. This item does not have nor use any charges.

Rod of Cancellation: This rod is usable by any character. It will only work *once*, but will drain magical items it hits of all magic, making that item forever nonmagical. The target is treated as having an Armor Class of 9. The DM may adjust the Armor Class of an item if it is being used in combat (such as when trying to hit a sword).

Miscellaneous Magic Items

Bag of Devouring: This item looks like a normal small sack, but anything placed within it disappears and is lost forever 7-12 turns later. It will not affect living creatures unless the *entire* creature is stuffed inside the bag. This is impossible to do except with very small creatures.

Bag of Holding: This item looks like a normal small sack, but will actually hold treasures up to 10,000 coins in weight, but will only weigh 600 coins when full. An item to be placed inside the bag may be no larger than 10' x 5' x 3'. An object any larger than that will not fit inside.

Broom of Flying: Upon command, the **Broom** will carry its owner and fly through the air at a rate of 240' per turn. It can carry 1 extra person, reducing speed to 180' per turn.

Crystal Ball: This item can only be used by an elf or magic-user. Its owner may look into it and see any place or object thought of. It will work 3 times per day, and the image will only last for 1 turn. Spells cannot be cast "through" the crystal ball. The more familiar the object or area to be seen, the clearer the picture will be.

Elven Cloak and Boots: Wearing the **cloak** will make a person nearly invisible, while the **boots** allow a person to move silently. A character wearing an elven cloak will only be seen on a roll 1 (on 1d6). After attacking, the wearer will be visible for the rest of the turn.

Gauntlets of Ogre Power: These gauntlets will give the wearer a Strength score of 18. If a weapon is used in combat while wearing these **gauntlets**, the wearer will gain the bonus of +3 on "to hit" and damage rolls. If a weapon is not used, the wearer may strike with one fist each round. A punch will do 1-4 (1d4) points of damage, gaining a +3 on

"to hit" rolls only. The wearer may carry an additional 1000 coins of weight without being encumbered.

Helm of Alignment Changing: This item looks like a fancy helmet. When the **helm** is put on, it will immediately change the wearer's alignment (the DM should determine the new alignment randomly). This device may only be taken off by using a **remove curse** spell (see the D&D EXPERT RULES); the wearer will resist the removal. The DM may allow the character to remove it by performing a special task or adventure.

Helm of Telepathy: This item looks like a fancy helmet. The wearer of this **helm** may read the thoughts of any creature within 90' by concentrating on that creature. To make the **helm** work, the wearer must concentrate on the creature and not move. The wearer will understand the creature's thoughts, and may "send" thoughts to the creature; however, the creature may refuse to respond.

Medallion of ESP: This magical medallion is strung on a chain to be worn around the neck. If the wearer concentrates for 1 round, he or she may read the thoughts of any one creature within 30'. The wearer may move normally but cannot fight nor cast spells while concentrating. The DM must check this item each time it is used: it will not work properly on a roll of 1 (on 1d6). If this occurs, it will broadcast the thoughts of the user to everyone within 30'. The DM may allow a saving throw vs. Spells to prevent the **medallion** from reading a creature's thoughts.

Rope of Climbing: This 50' thin, strong rope will climb in any direction upon the command of the owner. It may fasten itself to any protruding surface, and will support up to 10,000 coins of weight.

EXAMPLE: The DM sets up the lair of 30 goblins (an average number for a lair). Their listed Treasure Type is "C". Finding line "C", the DM gets the following results when rolling percentage dice:

Treasure Type	Listing for Type "C"	Dice Roll	Result
Copper pieces	20% 1-12	29	No copper present
Silver pieces	30% 1-4	02	Some silver present
Electrum pieces	10% 1-4	73	No electrum present
Gold pieces	Nil	—	(None; no roll needed)
Platinum pieces	Nil	—	(None; no roll needed)
Gems	25% 1-4	25	Some gems present
Jewelry	25% 1-4	42	No jewelry present
Magic Items	10% Any 2	06	2 magic items present

The DM then rolls to find the amounts of silver pieces and gems present in the goblin lair. Rolling 1d4 for each, the results of 2 and 3 mean that 2,000 silver pieces and 3 gems are present.

The value of the gems must be found. Rolling d% and using the **gems** table (page B47), the DM finds that they are worth 50 gold pieces each.

The types of magic items must be found. Rolling d% and using the **General Magic** table, the results of 18 and 53 mean that the **Sword** subtable and the **Potion** subtable must be used to find the exact items. Rolling the appropriate die for each subtable, the DM finds that a **sword + 1** and a **potion of healing** are in the goblin lair. The DM makes a note that the goblin leader will be using the **sword + 1** in combat.

The DM notes, with the room descriptions for the dungeon, exactly what treasures are in the lair of the 30 goblins. If there had been fewer goblins, the treasure would have been cut down to match their numbers. For example, if there were 10 goblins (1/3 of the given number), there should be 1/3 (or less) of the rolled treasure: 600 silver pieces, 1 gem, and 1 magic item — probably the potion.
