

D. DRAW THE MAP OF THE DUNGEON.

A dungeon map is usually drawn on graph paper. The map should be made in pencil so that changes can be made. Before actually drawing the map, the DM should determine the **scale**. The scale of a map is the number of feet each square on the graph paper is equal to. Most maps are drawn to a scale of 10' per square. The scale depends on the size of the dungeon and rooms. If, for example, the rooms are all larger than 100' on a side, or if the dungeon is thousands of feet long, the DM may wish to use a scale of 20' per square. On the other hand, a small tower such as the one in the following HAUNTED KEEP is better at 5' or 10' to a square.

The general shape of a dungeon is often determined by the setting. For example, a tower is usually round or square with smooth walls, while a cavern has an irregular shape and rough walls. If the DM has a good idea of where certain rooms and corridors will go, other sections of the map may be left blank, to be filled in later. Some standard dungeon symbols are given with the sample dungeon maps.

E. STOCK THE DUNGEON.

To "stock" a dungeon means to fill in the general details, such as monsters, treasure, and traps. Special monsters should be first placed in the appropriate rooms along with special treasures. The remaining rooms can be stocked as the DM wishes. If there is no preference as to how certain rooms are stocked, the following system may be used. Roll 1d6 for CONTENTS, and then roll on the second table for TREASURE according to the result of the first roll. A "Yes" result means that Treasure is there along with whatever is indicated by the first roll.

First Roll: CONTENTS

Second Roll: TREASURE?

Die Roll	Result	Die Roll	Monster	Trap	Empty
1-2	Monster	1	Yes	Yes	Yes
3	Trap	2	Yes	Yes	No
4	Special	3	Yes	No	No
5-6	Empty	4-6	No	No	No

A **Monster** result means that the DM should roll on a **Wandering Monsters** table to determine the type present. A **Trap** may be located in an empty room or on treasure. A **Special** is anything not exactly a trap, but placed for special reasons. The DM should make up traps and specials, but some suggestions are given below.

ROOM TRAPS:

Poison gas: Save vs. Poison or die
 Fog: Looks like Poison gas, but harmless
 Pit: 1d6 points of damage per 10' fallen
 Ceiling Block falls: Save vs. Turn to Stone or take 1d10 points of damage
 Pendulum blade from ceiling: 1d8 points of damage
 Chute: No damage, but slide to the next level down

TREASURE TRAPS:

Poison needle: Save vs. Poison or die
 Spring-fired darts: 1-6 darts hit for 1-4 points of damage each
 Flash of light: Save vs. Spells or be blinded for 1d8 turns
 Poison snake (see SNAKE in monster descriptions)
 Spray: Be sprayed with an unknown liquid that attracts Wandering Monsters; double chances for 1d6 hours
 Illusion: Anything; often a monster (as **phantasmal force**)

SPECIALS:

Moaning room or corridor
 Room turns or sinks while the door locks
 Illusionary stairs or corridor
 Shifting block to close off corridor

Trap door to tunnels
 Alarm that summons special monster
 Talking statue
 Magic pool whose waters have a strange effect
 Magic gate to another part of the dungeon
 Flying weapons which attack only if disturbed

TREASURE: If treasure is in a room with a monster, use the Treasure Type for that monster (given in the monster description) to find the treasure in the room. If treasure is in a room without a monster, use the **Unguarded Treasure** table (below). The table is used in the same way as the **Treasure Types** table (page B45).

Unguarded Treasure

Dungeon Level	*Silver Pieces	Gold Pieces	Gems	Jewelry	Magic Items
1	1d6 x 100	50%: 1d6 x 10	5%: 1d6	2%: 1d6	2%: Any 1
2-3	1d12 x 100	50%: 1d6 x 100	10%: 1d6	5%: 1d6	8%: Any 1

*Note that there are always silver pieces in unguarded treasure, and that other items are given in terms of the die rolled to determine the number present.

F. FILLING IN FINAL DETAILS.

Once the rooms have been stocked, the DM can fill in details about the corridors (such as traps or regular patrols of monsters). The DM should also "stock" the dungeon with some normal items, smells, sounds, and so forth. Inhabited and empty rooms could be given whatever normal furnishings would be common in the dungeon. The DM should be careful not to use too much nor too little detail; some detail will help the players imagine the areas that they are exploring, but too much detail is often just boring.

CREATING AN NPC PARTY

Since it takes time to create a fully detailed NPC party, many DMs will prefer to prepare them in advance for use as either Wandering Monsters or as planned encounters. The DM may choose the NPCs in a party or determine them randomly. A suggested system for rolling up an NPC party is as follows:

- Determine the number of NPCs in the party:
5-8 (roll 1d4 + 4).
 - Determine the class of each character (roll 1d8):

1 Fighter	5 Dwarf
2 Magic-user	6 Elf
3 Cleric	7 Halfling
4 Thief	8 Fighter
 - Determine the level of each character (roll 1d6):

1,2 First level
3,4 Second level
5,6 Third level
 - Determine the alignment of each character (roll 1d6); the DM may only roll once, if desired, and make all the alignments the same:

1,2 Lawful
3,4 Neutral
5,6 Chaotic
 - Randomly determine or choose any magic-user, elf, and cleric spells.
 - Choose special treasures or roll for possible treasure (U + V). If a magic item is rolled up, a member of the NPC party will use it in combat if at all possible.
 - Decide on a marching order for the group.
- The DM may want to roll for NPC ability scores, also.
