

WANDERING MONSTERS

Besides the monsters which live in rooms, characters may encounter monsters which wander about the dungeon. These monsters are known as "Wandering Monsters". At the end of every 2 turns, the DM should check for Wandering Monsters. To do so, roll 1d6: a result of 1 indicates that the party will encounter a Wandering Monster in the next turn. The Wandering Monster will be 20-120 feet away from the party when encountered (roll 2d6, multiply the result by 10) in a direction of the DM's choosing, and will be headed toward the player characters.

Wandering monsters may be determined at random or selected by the DM. The **Wandering Monster** tables (below) give a balanced mixture of monsters for the dungeon levels. The DM may create his or her own tables. The dungeon may have certain areas where Wandering Monsters are encountered more often (such as on a roll of 1 or 2). The dungeon may have areas where the DM checks for Wandering Monsters every turn, or where a monster will appear when a corridor is entered. Wandering Monsters should appear more often if the party is making a lot of noise or light, but should not be frequent if the party spends a long time in one out-of-the-way place (if they stop in a room for the night, for example).

The DM may want to create special wandering monster tables for specific areas or dungeons. These might include the monsters which live in the area, patrols, and animals (vermin) which can be found there. An example would be a cave complex with goblins living in it. A wandering monster table for this area could have encounters with normal goblins, goblin patrols and perhaps a chance of running into bats or rats.

Most Wandering Monsters are the same level as the level of the dungeon (in other words, they have a number of hit dice equal to

the number of the dungeon level). The "Number Appearing" of some monsters has been adjusted to make them more appropriate for encounters on a dungeon level.

Use the table for the dungeon level being explored. Roll 1d20 to find the type of Wandering Monster. The information given will include the alignment of the monster (**A** = Any alignment, **L** = Lawful, **N** = Neutral, **C** = Chaotic) and the following abbreviations for other information: **No.** = Number Appearing; **AC** = Armor Class; **HD** = Hit Dice; **Move** = Movement rate per turn (followed by rate per round in parentheses); **Save** = Saving throw, using the abbreviations for Fighter (**F**), cleric (**C**), magic-user (**M**), thief (**T**), dwarf (**D**), elf (**E**), halfling (**H**), and normal man (**NM**).

WANDERING MONSTERS: LEVEL 1

Die Roll	Wandering Monster	No.	AC	HD	Damage	Move	Save	Morale
1	Acolyte (A)	1-8	2	1	1-6	60' (20')	C: 1	7
