

CHARACTERS

long, weighs 500 cn and can be carried overland by two people. Canoes are used mainly on rivers or in swamps. A canoe can carry up to 6000 cn.

Cart. This may be pulled by one or two draft horses (or 2 or 4 mules) at a rate of 60' per turn. A cart will carry 4,000 cn weight when drawn by a single horse and 8,000 cn with two. A cart may move through deserts, mountains, forests or swamps only on a road.

Crowbar. A one inch thick, specially hardened, iron bar used for prying open such objects as chests or windows. A crowbar is 2-3 feet long.

Flask of Oil. Oil is burned in a lantern to give light. It may also be thrown at monsters or poured on the floor and lit to delay pursuit.

Galley, Large. A large galley is a long ship with a shallow draft (length 120'-150', beam 15'-20', draft 3'). It will have a single mast, with one large square sail. The standard crew is 180 rowers, 20 sailors, 50 marines, and a captain. Besides the crew the large galley can carry up to 40,000 cn cargo. If desired, the galley can be built with a ram (increase cost by 1/3) and up to two light catapults (one for the bow and one for the stern). An historical example is the Mediterranean trireme.

Galley, Small. This ship is similar to a large galley, but smaller and lighter (length 60'-100', beam 10'-15', draft 2'-3'). The standard crew is 60 rowers, 10 sailors, 20 marines, and a captain. Besides the crew, the small galley can carry up to 20,000 cn. A small galley may also be fitted with a ram and up to two light catapults. Historical examples include the bireme and the pentaconter (no ram).

Galley, War. This is a specially constructed large galley that often serves as a flagship of a fleet (length 120'-150', beam 20'-30', draft 4'-6'). The standard crew is 300 rowers, 30 sailors, 75 marines, and a captain. It is always built with a ram and a full deck over the rowers. It will have two masts. A war galley has light wooden towers in the bow and stern. These are platforms about 10'-20' square, rising 15'-20' above the deck. A war galley can be fitted with up to 3 light catapults and can carry 60,000 cn, in addition to the crew. An historical example is the Mediterranean quinquereme.

Grappling Hook. A large 3 or 4 pronged hook, made of specially hardened iron, used to anchor a rope.

Hammer (small). A hammer is useful to pound iron spikes into the wall or floor.

Holy Symbol. The sign or symbol of a given deity that is worn by a cleric. Each cleric must have a holy symbol.

Holy Water. This water is made holy by a high level NPC cleric. It will cause damage to **undead** monsters when thrown at them, and may be used in certain clerical rituals.

Iron Spikes. Iron spikes are used to wedge doors open or shut, or to provide an anchoring point for a rope.

Lantern. A lantern burns one flask of oil in four hours (24 turns), giving light in a 30' radius. Lanterns can be shuttered to prevent the light from being seen and to protect the flame from strong winds.

Lifeboat, Ship's. A typical lifeboat has a 20' length, 4'-5' beam, and 1'-2' draft. It has a collapsible mast, and carries a week's provisions for 10 men. In addition, it will hold 15,000 cn weight. Small ships normally carry 1 or 2 lifeboats; large ships carry 3 or 4. However, lifeboats must be purchased separately from larger vessels. Each lifeboat carried will reduce the capacity of larger vessels by 5000 cn.

Longship. The longship is a long, narrow ship that can be either sailed or rowed by the crew (length 60'-80', beam 10'-15', draft 2'-3'). It operates equally well on rivers, coastal waters, or ocean. The standard crew is 75 sailors (who double as rowers and marines) and a captain. It only takes 60 crew to row the longship at full speed. A longship can carry up to 40,000 cn of cargo. A historical example is the Viking longship.

Mirror. A mirror is used to reflect the petrifying gaze of a medusa,

D&D: EXPERT

or similar creature, or to look at things indirectly.

Pole, Wooden (10' long). A thick (2" diameter) pole that is useful for probing pools, piles of rags, etc.

Raft. A raft is a floating platform or barge. They are awkward and unmaneuverable, but can be poled along in gentle currents. Professionally built rafts have raised edges to keep water from washing over the side, a tent or small wooden hut for shelter, and a crude steering oar. Their maximum size is 30' x 40'. Such rafts are often dismantled and sold for the value of the wood (1/4 price) once their cargo reaches a downstream port. Rafts may also be found as ferries at river crossings. Each 10' x 10' section will support 10,000 cn weight.

Characters can build their own rafts if wood is available. Such rafts will be nothing more than crude platforms. This will take 1-3 days per 10' square section (maximum size 20' x 30') and each section will support only 5000 cn weight.

Rations, Iron. Preserved food for one person for one week.

Rations, Standard. Unpreserved food for one person for one week. Rations are sometimes thrown to monsters to delay pursuit.

Rope (50' length). A heavy climbing rope that can support about three fully loaded men.

Sack, Large. A large sack holds 600 coins.

Sack, Small. A small sack holds 200 coins.

Saddle Bag. A saddle bag holds 300 coins.

Sailing Ship, Large. A large sailing ship is a deep, broad ship with up to three masts (length 100'-150', beam 25'-30', draft 10'-12'). It usually has one or more decks, and the bow and stern are raised "castles" to give archers a better field of fire. The standard crew is 20 sailors and a captain. Up to two light catapults can be mounted on a large sailing ship. In addition to the crew, up to 300,000 cn of cargo can be carried. An historical example is the medieval Great Cog.

Sailing Ship, Small. This is similar to a large sailing ship but smaller, often having only one mast (length 60'-80', beam 20'-30', draft 5'-8'). The standard crew is 10 sailors and a captain. In addition to the crew, up to 100,000 cn of cargo can be carried. An historical example is the medieval cog.

Stakes and Mallet. This includes three large (18") wooden stakes and a mallet to drive them with. These are useful for destroying vampires.

Thieves' Tools. A thief must have this small case of lockpicks to use his "Open Locks" ability.

Tinderbox. A tinderbox holds flint, steel, and tinder. It is used to start fires, light torches, etc. It takes one round to use a tinderbox, and the attempt will succeed on a 1d6 roll of 1 to 2.

Torch. A torch casts light in a 30' radius for one hour (six game turns).

Troop Transport. These are large sailing vessels specially adapted to carry troops. They can carry twice as many men and horses as a large sailing ship. Troop transports often have special modifications. For example, when horses are transported, special hatches are cut into the side of the ship, then the horses are loaded on and sealed in for the voyage!

Wagon. A wagon may be pulled by 2 or 4 draft horses (or 4 or 8 mules) at the same speed as a cart. Two creatures will be able to pull a load of 15,000 cn, while 4 creatures may pull a load of 25,000 cn. The same terrain restrictions for a cart apply to a wagon.

Water/Wineskin. A wineskin holds one quart of liquid.

Wolvesbane. A dried bundle of wolvesbane may drive off werewolves and other lycanthropes if the character hits the creature with the wolvesbane in hand-to-hand combat.
