

Pursuit speed in the wilderness is equal to 3 times the combat speed of the character. The same man given in the example above (who moves 90' per turn in the dungeon) would be able to move 90 yards or 270' in one round if he was being chased or chasing something. Such speed may only be maintained for short periods of time and requires rest immediately after.

The table below shows how many miles per day creatures may move, based upon their move per turn.

Move per Turn	Miles/Day
30'	6
60'	12
90'	18
120'	24
150'	30
180'	36
240'	48

A party may only move as fast as its slowest member.

The type of terrain the party is moving through affects the distance a party may travel. Although it makes no difference to the combat round or the 10 minute turn, the terrain may increase or decrease the number of miles a character may move in a day. The table below gives the change in movement for different types of terrain.

Terrain	Movement is . . .
Clear, city, trail, grasslands	normal
Forest, hills, desert, broken	2/3 the normal rate
Mountains, jungle, swamp	1/2 the normal rate
Road	3/2 the normal rate

A party can move through several types of terrain as long as it has enough movement to do so. It is suggested that all movement be rounded down to the nearest mile. For example, a party with a daily move of 12 miles starts in clear terrain. It then moves 3 miles to a road (cost: 3 miles), travels 9 miles along the road (cost: 6 miles) and moves 1½ mile into the mountains (cost: 3 miles) before camping for the night (total cost: 3 + 6 + 3 = 12 miles).

FORCED MARCH: A character may increase the number of miles travelled in a day by using a forced march. Characters using this option will move one and a half times their normal day's movement rate. Thus a character who moves 24 miles a day normally would be able to force march 36 miles. A forced march requires that the characters rest for one full day immediately after the forced march.

Waterborne Travel

For information concerning the movement rates of ships and other water craft, see **PART 9. WATERBORNE ADVENTURES**.

Travelling by Air

Characters may gain the ability to fly by means of magic carpets, rings, spells, broomsticks, and other items of a similar nature during the campaign. Some may even be fortunate enough to own a flying steed. Since travelling by air is easier and can take one farther and faster, the distance one can travel in a day is double the usual day's travel of that speed. Thus a flying creature that moves 180' could fly 72 miles in one day. Furthermore, terrain will not slow a flying creature at all, so all things in the air may ignore the effects of terrain on movement.

The DM or players may desire to have characters ride flying creatures or have creatures pick the characters up. The following table gives guidelines for the size of creature that can be carried by an aerial monster.

- 3 or more hit dice may lift halflings or smaller*
- 6 or more hit dice may lift men or smaller
- 12 or more hit dice may lift horses or smaller
- 24 or more hit dice may lift elephants or smaller

*Pegasi and hippogriffs may carry men and their gear due to the structure of their bodies.

Obstacles to Movement

Travelling in the wilderness, whether by land, water or air, is not always easy as there are often features or events that will present delays or obstructions. These may include unfordable rivers, massive cliffs, snowbound passes, rapids, sandbars, waterfalls, dense forests, or vile and treacherous moors or swamps. Aerial travel may be affected by thunderclouds, strong winds, fog, or mountains too high to fly over. Occasional use or placement of these obstacles will add interest and challenge to wilderness travel.

REST: Characters must rest one full day for every six days they spend travelling. Rest may also be required after evading monsters (see D&D Basic rules). Parties who do not rest will have a penalty of -1 on "to hit" and damage rolls during encounters.

Becoming Lost

Unless the party is following a known path, or moving along a river or coastline, or toward a visible terrain feature, they may become lost. The characters will discover this on their own as they move. The DM will keep track of a lost party's actual position and direction of movement (see p. X56). If lost, the party may try to find the right direction, backtrack, or find terrain features they recognize.
