

PURSUIT. If the party fails to evade, they must fight or move away in a random direction (no mapping). If the other group is faster, there is a 50% chance the party will be caught. If the party is not caught, they may try to evade again. This procedure is repeated until the party successfully evades or is caught. (This may result in the party being chased for several days, if the pursuers are really serious about catching them.)

**COMBAT**

The **Combat Sequence** is the same as in the D&D Basic rules:

Combat Sequence

- A. Each side rolls for initiative (1d6).
- B. The side with initiative acts first:
 1. Morale checks, if needed
 2. Movement
 3. Missile fire combat
 4. Magic spells
 5. Melee combat
- C. Each remaining side then completes the above actions in order.
- D. The DM handles any surrenders, retreats, etc., as they occur.

Combat is generally the same as in the D&D Basic rulebook, except that the tables have been expanded. The creature's hit dice or class level is compared to the armor class of the defender to find the minimum number needed to hit. The **CHARACTER ATTACKS** chart has the different character classes and levels listed on the left side of one chart. To find the number needed "to hit", find the column that matches the character's class and level. The "to hit" number is read on the same line as the opponent's Armor Class. For example, an 8th level fighter hits Armor Class 2 on a roll of 12 or better.

Defensive Movement

Movement in combat is handled per *round*, as explained before. However, only the following special forms of movement are possible once opponents are engaged in melee. These types of defensive movement may be used by both characters and monsters. A character who wants to use one of these forms must say so *before* the initiative roll for the round. Meleed creatures who slay all their opponents are no longer meleed.

FIGHTING WITHDRAWAL. A **fighting withdrawal** may be used in combat if the defender wishes to back up slowly. Movement backwards is limited to $\frac{1}{2}$ the normal movement rate per round (or less). There *must* be enough room to back up. In crowded situations, characters or monsters behind a creature attempting to use a fighting withdrawal will prevent this form of defensive movement.

RETREAT. Any movement backwards at more than $\frac{1}{2}$ the normal movement rate is a **retreat**. If a creature tries to retreat, the opponent may add +2 to all "to hit" rolls, and the defender is not allowed to make a return attack. In addition to the bonus on "to hit" rolls, the attacks are further adjusted by using the defender's Armor Class *without a shield*. (Any attacks from behind are adjusted in the same manner.)

SAVING THROWS

As characters advance in levels of experience, saving throws become easier to make. For example, a 3rd level cleric makes a saving throw vs. Poison with a roll of 11 or better, while a 10th level cleric saves vs. Poison with a roll of 6 or better. The expanded saving throw tables are given below.

CLERICAL

Clerical Level	Death Ray or Poison	Magic Wands	Paralysis or Turn To Stone	Dragon Breath	Rods, Staves, or Spells

The character's equipment is assumed to survive if the character survives. If the character is killed by a special attack form (**fire ball**, **dragon breath**, etc.) normal equipment is considered destroyed. The DM may give magic items a saving throw equal to that of the character, and may allow a saving throw bonus equal to the item's bonus in combat, if any (**armor +2** saves at +2, a **ring of protection +1** saves at +1, etc.).
