

Water Movement Modification Chart (optional)

Roll 2d6 at the start of each day and find the result.

Dice Roll	Effect
2	Becalmed. No movement except by oar. Oared movement reduced to 1/3 normal amount to take into account rower fatigue.
3	Extreme light breeze or beating before normal winds. All movement reduced to 1/3 normal rate.
4	Light breeze or quater reaching before normal winds. All movement reduced to 1/2 normal rate.
5	Moderate breeze or broad reaching before normal winds. All movement reduced to 2/3 normal.
6-8	Normal winds. Normal movement.
9	Strong breeze. Normal movement plus 1/3 extra movement.
10	High winds. Normal movement plus 1/2 extra movement.
11	Extreme high winds. Double normal movement*.
12	Gale. Eighty percent chance of a galley sinking. Triple normal movement in random direction**.

*20% chance of galley shipping water, 10% chance for all other ships. Any ship which ships water will have its speed reduced by 1/3 until it can dock and make repairs.

**Roll 1d6: 1 = current direction, 2 = 60 degrees starboard (or to the right), 3 = 120 degrees starboard, etc. Use rules already given concerning running before the gale.

ENCOUNTERS AT SEA

Visibility. Land can be seen at a distance of 24 miles on a clear day. The DM can reduce this for local conditions: night, fog, haze, storms, etc. Ships out of sight of land are lost unless a **navigator** is aboard. Approaching ships (encountered pirates, for example) can be seen and identified at 300 yards on a clear day, or can come as close as 40 yards in a dense fog before being spotted. Monsters are encountered at normal distances (40-240 yards).

Surprise. Monsters surprise ships as normal. Ships never receive surprise unless a special condition (such as fog) exists.

Evasion. Whenever an encounter at sea is indicated, the target can make one attempt to **evade** the pursuer (whether it's a ship or a monster). The chance to evade is based on the difference in speed between the opposing vessels. Each pursued ship has a separate roll to evade.

Difference In Speed (per round)	Chance Of Evasion
pursued vessel is: faster than pursuer	80%
0'-30'/round slower	50%
31'-60'/round slower	40%
61'-90'/round slower	35%
91'-120'/round slower	25%
121 + '/round slower	10%

If Evasion is successfully rolled, the attacker has lost sight of the pursued vessel and cannot attempt to attack it again until the following day (if it happens to be encountered again). If the Evasion attempt is not successful, the pursuing ship starts at the distance it is spotted at (300 yards on a clear day) and begins to close the distance. If the pursuing vessel is in the 0'-30' Speed Difference

range (or is slower than the pursued ship), the pursuer will close at 30' (10 yards)/round. If the Speed Difference is greater than 30'/round, the pursuer will close at that rate.

COMBAT AT SEA

Combat at sea is fought in combat rounds of 10 seconds each, with **ramming** taking place at the same time as missile fire. Once ships close, the crews will attempt to grapple and board the opponent. For boarding actions, it is helpful to have a sketch of the ships' deck plans. A scale of 1" = 5' is often convenient. Unless otherwise specified, most giant sea creatures and certain magic attacks will do 1 hull point of damage for every 5 points of normal damage the attack does.

Catapults. Light catapults can be mounted on some ships. They can throw rocks or flaming pitch at a range of 150 to 300 yards, but not at any close targets.

Light catapults need a crew of 4 for maximum efficiency. The catapult is fired every fifth round as long as four crew are left, every eighth round with three crew, every tenth round with two crew, and cannot be operated at all by one person. A catapult fires as a fighter of a level equal to the *number* of crew. Thus, if fired by a 3 man crew the DM would need to roll the same "to hit" score that a 3rd level would use. The DM may adjust this number for rough seas or other factors.

Rocks thrown by catapults affect a 10' x 10' area, and do 3-18 hull points of damage. Flaming pitch will set a 10' x 10' area on fire, doing 1-6 hull points of damage per turn of burning. The flames will spread if not fought by several crew: 5 crew can put the fire out in 3 turns; 10 crew can extinguish the flames in 2 turns; and 15 crew can put the flames out after 1 turn of burning. Pitch will always burn at least one turn regardless of the number of crew assigned to fight the blaze.

Rams. Large and small galleys may be fitted with a ram on the bow. These are useful for striking large targets such as other ships or giant sea creatures. When making a ram attack, the chance to hit AC 9 is 10. One is added to the chance to hit for each armor class below 9 (i.e. a 12 is needed to hit AC 7). The DM may modify this because of weather, maneuverability, or other factors. Rams that hit other vessels will do 50-80 (1d4 + 4) points of damage (small galley ram) or 60-110 (1d6 + 5) points of damage (large or war galley ram); giant sea creatures will suffer 3-24 (3d8) points (small galley) or 6-36 (6d6) points (large or war galley) from rams. Small individual targets will be impossible to hit as they are able to outmaneuver the ramming vessel.

Repairing Hull Damage. Damage from any type of attack on a ship can be repaired at the rate of 1 hull point of damage per turn. This requires that at least 5 crew be assigned to repair duty during the entire turn. Because repairs at sea were makeshift, no more than 1/2 the damage sustained by a vessel can be repaired until the vessel returns to a port facility.

Ship Damage. Attempts to put out fires and repair hull damage take place **after** damage for the round is scored on the ship. Crew working at these tasks cannot do anything else. Each 10% of hull damage reduces speed by 10%. Each 10% loss of rowers reduces rowed speed by 10%.

Grappling and Boarding. If both ships' crews want to grapple, the attempt is automatic. If only one ship's crew wants to grapple, a 1 or 2 must be rolled on a 1d6 for success. Grappling may be attempted each round that the ships are adjacent. Once the ships are grappled, the boarding battle is fought just like a large melee; however, attackers boarding a ship attack and defend at -2 during the round they are boarding. The boarding action continues until the crew of one ship is killed or surrenders.
